Restriction/ Election

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-49 and 69 are drawn to a method for the production of a hindered phenolic alkyl ester compound by reacting methyl acrylate with an alkylphenol compound in the presence of a first catalyst, further reacting an alcohol with the methyl ester intermediate in the presence of a second catalyst, classified in class 560, subclass 75.
- II. Claims 50-68 are drawn to a composition comprising 3,5-di-tert-butyl-4-hydroxyhydrocinnamic acid, alkyl ester, 2-[[3,5-di-tert-butyl-4-hydroxyphenyl]methyl] pentanedioic acid dialkyl ester, 3,5-di-tert-butyl-4-hydroxyhydrocinnamic acid, methyl ester, and other components, classified in class/ subclass 508/365,510/108.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)).

In the instant case, the invention of Group I involves a method of making for the production of a hindered phenolic alkyl ester compound, whereas Group II related to the

Art Unit: 1625

composition comprising 3,5-di-tert-butyl-4-hydroxyhydrocinnamic acid, alkyl ester, 2-[[3,5-di-tert-butyl-4-hydroxyphenyl]methyl] pentanediolic acid dialkyl ester, 3,5-di-tert-butyl-4-hydroxyhydrocinnamic acid, methyl ester, and other components can be obtained a process different from Group I as disclosed in Hasui et al (U.S. 4,405,807). Therefore, they are two different and distinctive inventions unrelated to each other.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1625

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
